

# Action Plan

Realising the Vision for Te Waihora/Lake Ellesmere

Left to right – harakeke/flax, bully, little black shag, tuna/eel, kotuku/white heron, juncus Front cover, top to bottom – pied stilts, Harts Creek, volunteers at Chamberlains Ford, sand flounders, Te Waihora from Waikirikiri/Selwyn river mouth

### Te Waihora/Lake Ellesmere

- A place where healthy and productive water provides for the many users of the lake while supporting the diversity of plants and wildlife that make this place unique.
- A place of cultural and historical significance that connects us with our past and our future.
- A place where environmental, customary, commercial, and recreational values are balanced while respecting the health of the resource.
- A special wide open place for the enjoyment and wonderment of present and future generations.
- A place of contemplation and tranquillity as well as activity, a place just to be.

#### Our mission statement:

Waihora Ellesmere Trust (WET) is a community organisation dedicated to the improvement of the health and biodiversity of Te Waihora/Lake Ellesmere and its catchment.

Acknowledging the past and looking to the future, we:

- Educate enhancing understanding, awareness and the values of the Lake through education programmes, newsletters, and field days.
- Facilitate -promoting better management practices through public seminars and by partnering with private landowners, community groups and government agencies.
- Activate providing opportunities and encouragement for people to get actively involved in projects to rehabilitate the ecosystem through riparian and wetland enhancement.

Working to make our place better.

## PART A

## 1. Purpose of this plan

This plan is intended to build on the *Community Strategy for the Future Management of Lake Ellesmere/Te Waihora and its Tributaries* detailed below. Taking account of progress made over the past decade and changes in planning context, Part B sets out issues and opportunities for all those involved in the management and governance of the catchment. A key difference to the *Strategy* however, is the inclusion of what this means for WET. This will be a way to identify our desired outcomes for Te Waihora/Lake Ellesmere and its catchment and guide our activities. This will assist with internal decision making around what sort of projects to get involved with and where to seek funding.

The plan is also a way to articulate to others how we see our role, what WET actually does, and how we see those activities contributing to the Vision for the lake. Waihora Ellesmere Trust represents a broad spectrum of interests and values and our activities will be varied.

The plan will provide a framework for regular reporting to Trustees, members and the wider community.

#### 2. Te Waihora/Lake Ellesmere

Te Waihora/Lake Ellesmere, one of New Zealand's most important wetland systems, is a brackish, shallow lagoon with an average depth of

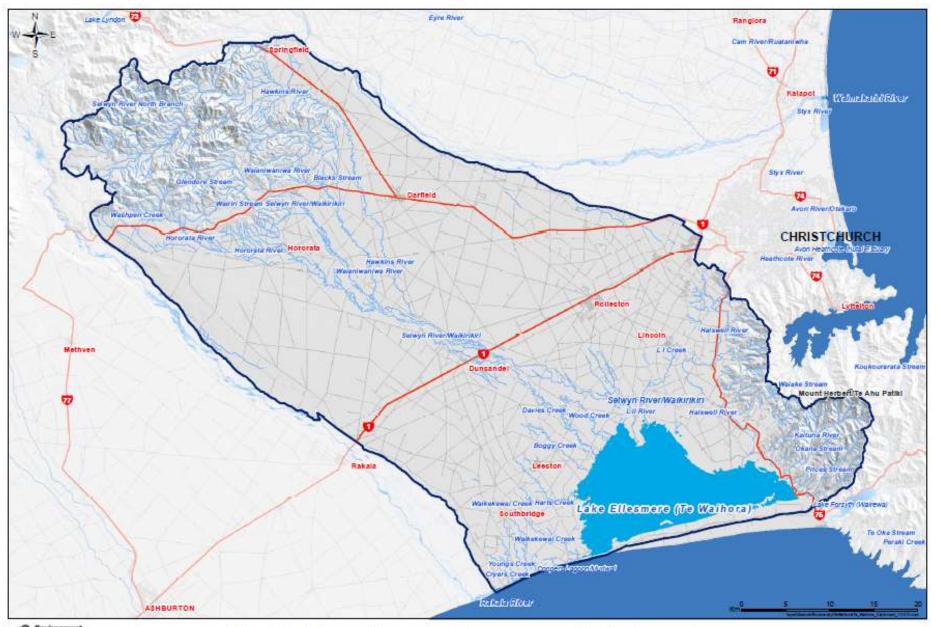

1.4m. Covering around 20,000 hectares, Te Waihora/Lake Ellesmere, which lies just to the south of Banks Peninsula, is New Zealand's fifth largest lake and is internationally significant for its wildlife abundance and diversity - 167 species of birds have been recorded, with very large numbers of some species. The fisheries are also important, with 43 species of fish recorded, and the indigenous wetland vegetation is recognised as being of national significance.

Te Waihora is an area of cultural, natural, historic, recreational and commercial importance to many people. To Ngāi Tahu, Te Waihora represents a major mahinga kai and an important source of mana. Te Waihora is a descriptive name, meaning spreading out waters.

In 1990 a National Water Conservation Order (WCO) recognised the Lake as an outstanding wildlife habitat. In December 2010 the Department of Conservation and Ngāi Tahu applied for a variation to the existing WCO.

In 2011 the hearing committee recommended a number of changes: including the words Te Waihora in front of Lake Ellesmere in the title of the WCO and throughout the document, in line with current accepted practice; expanding the list of the Lake's "outstanding features" to include habitat for indigenous wetland vegetation and fish, and significance in relation to tikanga Māori in respect of Ngāi Tahu history, mahinga kai and customary fisheries; and allowing additional lake openings at any level, primarily to aid eel migration, from April 1 to June 15.

Te Waihora/Lake Ellesmere Catchment

#### The Commissioners noted that:

By any conventional measure the current water quality in Te Waihora/Lake Ellesmere is very poor. The water is very turbid, with sediment stirred up by the wind in the very shallow waters (the maximum depth of the lake is only about 2m). Concentrations of the nutrients nitrogen and phosphorus are very high, which results in high concentrations of phytoplankton (very small algae) in the water column. A composite index that measures the trophic status of lakes (i.e. how enriched they are) indicates that Te Waihora/Lake Ellesmere is amongst the eutrophic (enriched) lakes in New Zealand. In calm summer conditions blooms of toxic blue green algae known as Cyanophyta can develop in parts of the lake.

Because of the highly enriched status, and because the water is well oxygenated by the wind, Te Waihora/Lake Ellesmere is a very productive water body. The lake is certainly not "dead" as has been asserted at times; rather it supports a great variety of flora and fauna.

As noted here, high concentrations of phosphorus (P) and nitrogen (N) contribute to the poor water quality. The sources of P and N are the lake sediment, where it has accumulated, and the water that flows in via the numerous lowland streams and rivers which drain the surrounding agricultural land.

Issues and challenges are outlined more fully later in this plan.

## 3. Background

#### 3.1 The Community Strategy 2003 - 2010

In 2004, following extensive community consultation, a *Community Strategy for the Future Management of Lake Ellesmere/Te Waihora and its Tributaries* drafted for the 'Lake Ellesmere Issues Group' was adopted by Waihora Ellesmere Trust. It set out a Vision for the next 50 years for the Lake and tributaries, guiding principles, strategic actions and a series of goals, targets and actions for the period 2004 – 2010.

#### 3.11 The Vision

- A place where healthy and productive water provides for the many users of the lake while supporting the diversity of plants and wildlife that make this place unique.
- A place of cultural and historical significance that connects us with our past and our future.
- A place where environmental, customary, commercial, and recreational values are balanced while respecting the health of the resource
- A special wide open place for the enjoyment and wonderment of present and future generations.
- A place of contemplation and tranquillity as well as activity, a place just to be.

#### 3.12 Guiding Principles

- Recognise and support the unique and diverse character of the lake.
- Provide opportunities for people to increase their knowledge and enjoyment of the lake.
- Promote ongoing consultation, involvement and action.
- Work co-operatively to achieve the Vision for the lake.
- Recognise and support the many and diverse uses of the lake while respecting and cherishing the ecosystem.

#### 3.13 Strategic Actions

Strategic actions are more general than those associated with specific targets, and promote long-term solutions to some of the fundamental issues.

- Manage the lake and its catchment in an integrated manner, i.e.
  ensure all plans, policies and actions are consistent and focus on
  the overall health of the lake and its catchment;
- Continue to provide opportunities for ongoing dialogue and debate on the different aspirations of the stakeholders in the lake and catchment;
- Over time, and involving the community, improve the health of the lake and its tributaries so that there is community ownership and pride in its local, national and potential international significance;
- Promote the principles of the Treaty of Waitangi (as set out in Appendix 1 of the <u>Canterbury Conservation Management</u> <u>Strategy</u> (2000))

The Strategy included 13 targets, each with several actions identified.

#### 3.2 Formation of WET

Given the nature of the issues, the complexity of the Lake and tributary system, and the number of targets identified, a co-operative approach was seen as the most efficient, effective and equitable solution to achieving long-lasting results. To this end the Lake Issues Group, with wider consultation, formed the Waihora Ellesmere Trust. Fifteen founding Trustees were nominated onto the Trust and had their first Trust Board meeting in September 2003.

The strategy, guiding principles and strategic actions underpinned the formation of WET in 2003.

#### 3.21 The Objects of the Trust are:

- i) To promote and, where appropriate, support best management practices as a means of maintaining and/or enhancing the ecological health of Lake Ellesmere/Te Waihora, including its tributaries.
- ii) To raise awareness regarding the cultural and historical significance of the Lake and its environs, including the settlement history and current status.
- iii) To provide appropriate dialogue opportunities for decisionmaking to ensure the various economic, social, cultural, recreational and environmental interests are considered.
- iv) To maintain the sense of place and character that makes the Lake and its environs special to current residents and users, and for future generations.
- v) To raise awareness and understanding of the values of the Lake to recreational and other users to ensure the integrity of the Lake is not compromised.
- vi) In attaining the Objects the Trust shall recognise the views and expectations of Mana Whenua, to respect and implement the dual heritage of the partners of Te Tiriti O Waitangi.

#### 3.3 Governance structure of WET

At the beginning of 2012 the Trust has around 100 members and a similar number of subscribers who receive newsletters and updates.

The members of the Trust elect up to 15 Trustees from a variety of sectors of the community, representing a wide range of different values associated with the Lake. The Trust Board meets at least 4 times per year, which includes the AGM held in September each year, and the Trustees have delegated the responsibility for day to day management to a Management Committee, which includes the Chair, the Deputy Chair and the Treasurer. This committee meets approximately six weekly and the staff report to the management committee.

## Summary of achievements

The actions set out in the *Strategy* were planned before WET came into existence and so focused on the role of statutory agencies, community groups in general, and members of the community. WET's role was to drive the implementation of this Strategy.

A *Community Strategy Update*, which outlines actions and progress towards the targets up to the end of 2010, along with the *Community Strategy itself*, can be downloaded from the WET website at <a href="https://www.wet.org.nz">www.wet.org.nz</a>.

#### 4. 2011 - 2021

A series of discussions and WET Trustee workshops held in the first half of 2011 reviewed and debated the relevancy of the *Community Strategy*, the Vision Statement and the Objects of the Trust. Informal discussions were also held with a number of Trustees and representatives of agencies and other organisations about the role of WET from 2011 onwards.

At the Trust meeting of July 18<sup>th</sup>, 2011 the Trustees confirmed that the Vision Statement developed in 2002/3 was still representative of the views of the community and should continue to underpin the actions of

the Trust. There was agreement that WET's focus is catchment wide and it was decided to develop a mission statement to reflect that interest in the wider catchment.

A mission statement, which can be seen on page 1 of this plan, was discussed and a draft agreed, and then accepted with a small amendment at the Annual General Meeting of September 19<sup>th</sup>, 2011. The headings 'Educate, Facilitate, Activate', which have been used for a number of years to describe the activities of WET, were incorporated into the mission statement. WET also reaffirmed a commitment to promoting consultation, involvement and action, and to working collaboratively to achieve the Vision for the Lake.

Discussion also covered the Objects of the Trust. At the meeting of July 18<sup>th</sup>, 2011 the Trustees also confirmed the Objects of the Trust, noting that Object 6 "In attaining the Objects the Trust shall recognise the views and expectations of Mana Whenua, to respect and implement the dual heritage of the partners of Te Tiriti O Waitangi" be retained and considered a guiding principle for the Trust.

The *Community Strategy* will continue to guide the work of the Trust in working towards the Vision. This Action Plan for WET builds on the achievements of the last decade, and sets out activities that the Trust can be involved with, providing the basis for annual planning.

## 5. Planning context

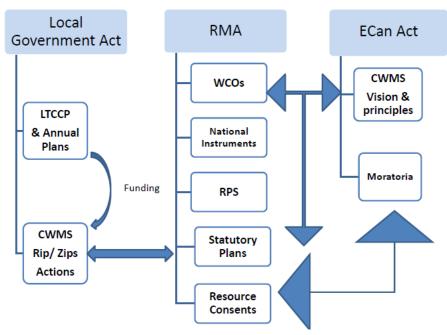

This plan will shape the work of the Trust, but the context within which the Action Plan sits is the national, regional and local planning framework<sup>1</sup>, which has changed a great deal over the last decade.

Of particular significance was the adoption of a (statutory) Joint Management Plan for Te Waihora/Lake Ellesmere by the Department of Conservation and Te Rūnanga o Ngāi Tahu in 2005. More recently the Canterbury Water Management Strategy (CWMS) has provided a framework for a more collaborative approach to managing water and land use in Canterbury and has increased community involvement.

Planning for the Lake and catchment is determined by national level instruments such as the Resource management Act (1991), Local Government Act (2002), the National Water Conservation (Te Waihora/Lake Ellesmere) Order 1990, National Policy Statements and National Environmental Standards and, more recently, the Environment Canterbury (Temporary Commissioners and Improved Water Management) Act 2010

The Canterbury Water Management Strategy is now being implemented, with the mechanism for translating the CWMS recommendations into regional and local plans being included in the ECan Act (2010). This will provide many opportunities for community

#### 6.1 Statutory planning framework - water

groups such as WET to become actively involved.

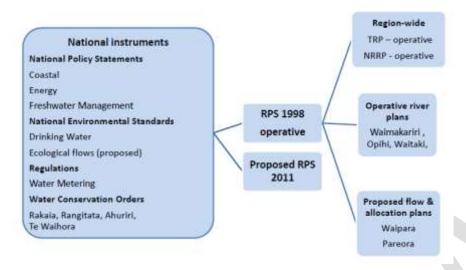

Under the CWMS there is a Regional Committee and Canterbury has been divided into 10 zones, each with its own Zone Committee. The Selwyn-Waihora Zone includes Te Waihora/Lake Ellesmere and its catchment.

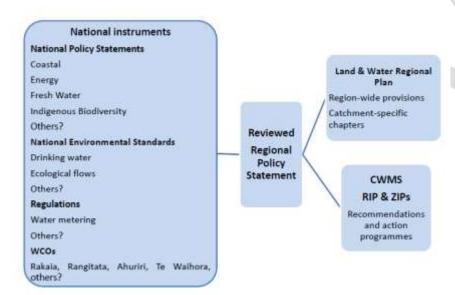

\_

<sup>&</sup>lt;sup>1</sup> Planning framework diagrams were prepared by ECan Commissioner Peter Skelton for the Living Lake, Changing Catchment Symposium in November 2011

#### 6.2 Existing planning framework for Canterbury

#### 6.3 Future planning framework for Canterbury

Consultation underway in 2012 is contributing to the development of a Selwyn-Waihora subchapter of the Land and Water Regional Plan. This step creates rules relating to water quantity and quality, and gives statutory weight to the recommendations of the Regional and Zone Committees

In August 2011 Whakaora Te Waihora was announced. This is a long-term relationship agreement and shared commitment between Environment Canterbury, Ngāi Tahu and Te Waihora Management Board. This agreement focuses on the restoration and rejuvenation of the mauri and ecosystem health of Te Waihora/Lake Ellesmere. The parties will also establish an enduring co-governance framework for the active management of Te Waihora and its catchment.

As part of this agreement a Joint Restoration Plan has been prepared and considerable funding has been committed to implementing it over 2-5 years.

There is a need for WET to be aware of these significant developments and to be flexible and ensure we contribute to and, where appropriate and consistent with the Vision, align with the new planning documents being prepared.

## 6. Community Consultation

Our draft Action Plan has been circulated for comments and feedback, firstly to Trustees and then to key stakeholders. It will be available to

members and the wider community via our website, and feedback will be encouraged. Once adopted, the plan will be a living document and will continue to be available on our website, with comments and feedback always welcome.

Our Trustees, representing a wide cross section of interest and expertise have guided the development of the draft Plan. We have also drawn on a number of community consultation processes currently underway or planned for later in the year, including 'Nutrient, flow and allocation limits in the Selwyn Waihora catchment ' (ECan), 'Future for Selwyn' (SDC), Whakaora Te Waihora (ECan/ Ngāi Tahu), and planned consultation about the Lake management regime and funding options. Consultation on the recently amended National Water Conservation Order and the recently adopted Selwyn-Waihora Zone Implementation Programme (ZIP) was also extensive.

For example, Future for Selwyn community workshops asked people to describe what they would like their grandchildren to be doing. Answers included: "...swimming, boating and fishing in local rivers and lakes...", "Farmers will have learned to minimise environmental impacts and utilise water wisely", "(People) will have a wider awareness of environmental impacts of water use".

## 7. Monitoring and review

The Action Plan will provide a framework for reporting to the Trustees, members and wider community at least annually at the Annual General Meeting of the Trust, held in September each year. A comprehensive annual report of activities will also serve as a means of recording the history of the Trust.

The Action Plan will be reviewed by the Management Committee annually in conjunction with budget setting, and will be guided by feedback and comments received during the year. Any significant changes will be discussed and require approval by the Trustees at the AGM. Essentially, review will be ongoing and regular revisions of the Plan will ensure that the issues and outcomes are still relevant. Current versions of the Action Plan will be available on the WET website.

Although outputs, such as volunteer planting events, new brochures, number of members/subscribers, can be measured and reported, it is much harder to assess the impact of these outputs. Are the actions addressing the issues in a meaningful way? When will the impacts of actions begin to be noticed?

One measure, currently used by the Regional Council, will be monitoring the Trophic Level Index (TLI) of the Lake. This is a composite index that measures the trophic status<sup>2</sup> of lakes in New Zealand. It considers phosphorus and nitrogen levels, as well as visual clarity and algal biomass. Environment Canterbury has determined that a TLI of 6 is desirable for Te Waihora/Lake Ellesmere. Currently, the TLI is generally well above 6, although has dropped at times. It is debatable whether or not a reduction of the TLI to around 6 is achievable, and also whether or not that would result in the outcomes desired for the Lake and articulated in the Vision statement. ECan will continue to monitor and report the TLI, although establishing links between actions and outcomes is not always straightforward.

There would seem to be a need for a regular "State of the Lake and Catchment" update, reporting on a range of indicators. This is an area addressed in Part B

13

<sup>&</sup>lt;sup>2</sup> A lake's trophic state is a measure of its "biological productivity", which is a measure of the mass of plants and animals in a lake. More details can be found on the LERNZ website <a href="http://www.lernz.co.nz/lake/trophic.html">http://www.lernz.co.nz/lake/trophic.html</a>

Harts Creek Bird Hide

## PART B

#### The Action Plan

This section will attempt to outline some of the issues and challenges facing Te Waihora/Lake Ellesmere, desired outcomes and possible actions that may achieve those outcomes. This is organised around four themes, based directly on the vision statement.

- A place where healthy and productive water provides for the many users of the Lake while supporting the diversity of plants and wildlife that make this place unique
- A place of cultural and historical significance that connects us with our past and our future.
- A place where environmental, customary, commercial, and recreational values are balanced while respecting the health of the resource.
- A special wide open place for the enjoyment and wonderment of present and future generations; a place of contemplation and tranquillity as well as activity, a place just to be.

A great deal of work is currently underway in the catchment and the key to successful outcomes will be good communication and collaboration. For each theme, issues and challenges are briefly outlined and outcomes identified with a (numbered) series of possible actions and an indication of who may be responsible for these actions.

The statement of issues and opportunities for each theme is very brief, subjective and informed by the knowledge and experience of the Trustees. It is an attempt to highlight the aspects that concern WET, and where we can make a contribution. There is evidence to inform these statements, including research undertaken by Lincoln University and University of Canterbury, the publication *Te Waihora/Lake Ellesmere: State of the Lake and Future Management*, which brings together information presented at the first Living Lake Symposium in 2007 (and which is available on the WET website). More recently, throughout 2011/12 a huge amount of information and scientific reports have been made available through the Zone Committee process and can be accessed via the Environment Canterbury website.

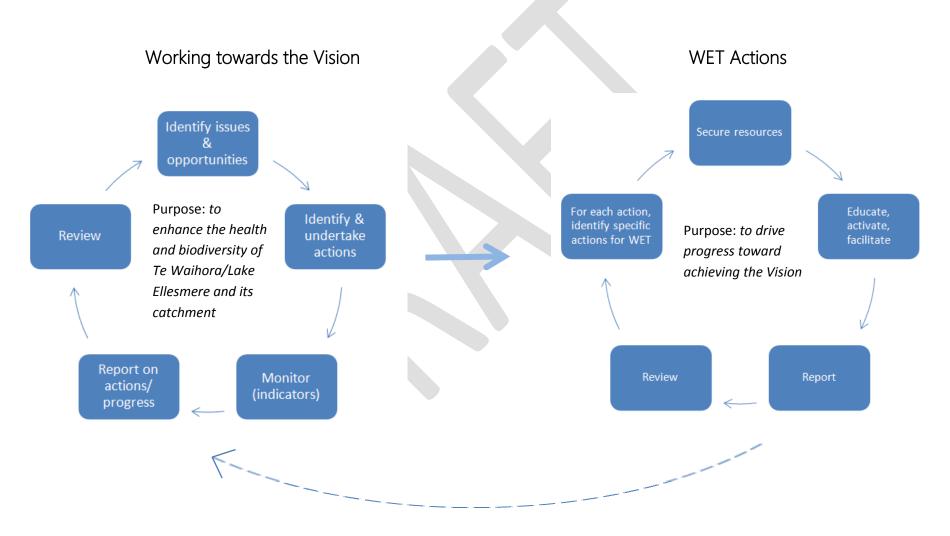

Below the overview of each theme, which includes an indication of outcomes sought and possible areas of action, is a section which identifies where WET fits into this overall picture and specifically how WET can contribute to the actions identified. The Objects (i) – (v) of Waihora Ellesmere Trust will provide a framework for actions and Object (vi) will be a guiding principle for the Trust. Activities that the Trust is involved in may contribute to more than one theme. The "What does this mean for WET?" tables include a general description of the "Action", a list of potential outputs and some more specific examples of what this might mean under the headings of Educate, Facilitate, and Activate.

The two tables should be read together, so that it can be seen how the WET actions may contribute to the outcomes sought.

It should be noted that the activities WET can undertake will depend on capacity and availability of funding. For that reason no priorities are indicated in the lists of possible actions. Many activities will provide opportunities for Trustees and members to become directly involved in

the work of the Trust. The activities suggested are not exhaustive and additional (relevant) activities can be added at any time.

## Statement of Issues/Opportunities for each theme

1. A place where healthy and productive water provides for the many users of the lake while supporting the diversity of plants and wildlife that make this place unique.

Significant changes to the catchment as a result of human impacts, including deforestation, draining of the land around the Lake, use of chemicals in agriculture and the growth of settlements have contributed to a decline in the quality of the habitat and biodiversity in and around the Lake. Recreational use is also adversely affected as water quality declines.

In order to manage issues we need to monitor a wide range of indicators to build a better understanding of the relationship between land and water use throughout the catchment and environmental, social, cultural and economic outcomes. There are numerous agencies with overlapping responsibilities for managing land and water use around the Lake and a great deal of monitoring already underway. However, relevant information on the state of the Lake and catchment and the factors which impact on that are not always brought together in a way that informs the community and decision makers.

## Working towards the Vision

	Issues/	Outcomes		Possible Actions	Performance	Who	Resources	When
	opportunities	sought			measure(s)			
1.1	Declining ecosystem health	A healthy state of the Lake and environs	1.11	Establish an indicator working party and agree a range of indicators for different values	Agreed set of indicators which are regularly measured and reported on (biennial report)	Research organisations (LU, UC, Landcare Research etc), councils, statutory agencies, iwi, community groups	\$\$, expertise Input from a wide range of agencies	Report every 2 years prior to symposium, first report 2013
			1.12	Raising awareness of impact of land and water use on Lake through education programmes etc	Increased awareness of impact of land use by land owners/managers and the wider public	Research organisations (LU, UC, Landcare Research etc), councils, statutory agencies, iwi, community groups	\$\$, expertise, industry and media cooperation	Underway – needs continued work to increase awareness. Measureable increase within 2 years
			1.13	Implement best management practices in the catchment (through ZIP and regional planning processes)	Rules established and enforced	Landowners (including public land) ECan, SDC, industry groups, community groups	\$\$, expertise, staffing to enforce rules	Preparatory work underway. Medium term (3 – 5yrs)

			1.14	Protect existing indigenous riparian biodiversity/ restore indigenous biodiversity	Updated comprehensive survey to establish extent of existing biodiversity and restoration projects	Landowners (including public land) ECan, SDC, iwi, industry groups, community groups	Access to private land, expertise, \$\$, eco-sourced plants	Work underway, but information not well collated. Comprehensive survey within 2 years
1.2	Lack of understanding of systems and impacts of land and water use on environmental, social, cultural and economic outcomes	Increased understanding of ecological and biophysical systems and impacts of land and water use; increased understanding of social, cultural and economic links to land and water use	1.21	Establishing appropriate systems for collecting and sharing data	Data collected regularly and accessible to key agencies and wider community	Research organisations (LU, UC, Landcare Research etc), councils, statutory agencies, iwi, community groups, industry, recreation, tourism sector	\$\$, expertise	Some work underway but gaps in data collection and what data is collected not always widely available. Improved availability Within 2 years
			1.22	Facilitating collaborative research projects	Number and nature of research projects underway	Research organisations (LU, UC, Landcare Research, NIWA etc), councils, statutory agencies, iwi, community groups	\$\$, expertise	Already underway - ongoing

			1.23	Undertake full investigation of impacts, considering a wide range of values within an integrated systems approach, of any proposals for development/ infrastructure likely to affect the Lake, environs or tributaries	Increased understanding of potential impacts to assist with decision making	Research organisations (LU, UC, Landcare Research, NIWA etc), councils, statutory agencies, iwi, community groups, industry, recreation, tourism sector	\$\$, expertise	Information available within 2 years of an issue being identified or sooner if the timetable for decisions or action requires it.
1.3	Climate change	Resilience to climate change	1.31		Increased awareness of impact of climate change	Research organisations (LU, UC, Landcare Research, NIWA etc), councils, statutory agencies, iwi, community groups	Access to survey data of changing perceptions, educated media	Underway – needs continued work to increase awareness. Measureable increase within 3 – 5 years

## What does this mean for WET?

	Action from WET	Outputs	EDUCATE	FACILITATE	ACTIVATE
1.11 Establish an	Facilitate a working	A biennial "State of the	Clarify and articulate	Facilitate an indicator	Ensure a biennial
indicator working party	party to determine	Catchment" report,	responsibilities and	working party as a sub	report is prepared,
and agree a range of	indicators and how to	available prior to next	expectations of	group of the Statutory	either by a key agency
indicators for different	collect and collate data	symposium. Consider	different agencies and	Agencies Group (SAG);	or by WET on behalf of
values	relating to indicators	information needs of	individuals	ensure wide range of	SAG. Ensure
	for reporting	different groups within		values represented	information is relevant
		the community in			for different groups.
		reporting			
1.12 Raising	Raise awareness of the	Written resources, web	Develop appropriate	Work with partners to	Organise/host
awareness of impact of	impacts of land and	pages, AV material,	display material and	ensure messages are	community
land and water use on	water use and	display material, events	resources & seek	consistent; make	talks/workshops
Lake through	potential solutions	and meetings,	opportunities to use it,	submissions on any	/symposia; attend A&P
education		submissions	eg A&P Shows, Field	plans/developments	Shows, Field days etc
programmes etc			days, website	which may impact on	
				ecological health of	
				Lake	
1.13 Implement best	Provide advice and	Written resources, web	Develop appropriate	Work with partners to	Seek funding to
management practices	support for landowners	pages, display material,	display material and	ensure messages are	support practical
in the catchment	on implementing best	events and meetings	resources & seek	consistent, eg	assistance/advice for
(through ZIP and	management practices,		opportunities to use it;	Sustainable Drain	landowners
regional planning	including riparian		celebrate success	Management project	
processes)	restoration			(SDM)	

1.14 Protect existing indigenous riparian biodiversity/ restore indigenous biodiversity	Provide advice and support for landowners on protecting/restoring indigenous riparian biodiversity and work with other organisations to collate data on new and existing restoration projects	Details of indigenous biodiversity and restoration projects included in <i>State of Catchment</i> report and remnants protected	Develop appropriate display material and resources & seek opportunities to use it; celebrate success	Work with partners to ensure messages are consistent and biodiversity sites protected/maintained	Assist with accessing funding; community volunteer planting projects to assist landowners
1.21 Establishing	Contribute to	Good systems in place,	Ensure relevant people	Bring different	Initiate data collection
appropriate systems	developing	notes from meetings ,	know about any data	stakeholders together,	and systems sharing if
for collecting and	appropriate systems	information on WET	collections, and how to	eg by facilitating the	applicable, and
sharing data	for data collection and	website, symposium	contribute data	SAG, host symposia	contribute/share data
	storage	every 2 years	through networking,		
			use of newsletters,		
			websites etc		
1.22 Facilitating	Facilitating	Research projects	Ensure potential	Look for opportunities	Assist with accessing
collaborative research	collaborative research	relevant to the Lake	researchers are aware	to link researchers and	funding
projects	projects		of possible areas for	projects	
			research, and potential		
			partners; summarise		
			and disseminate		
			research findings		

1.23 Undertake full investigation of impacts, considering a wide range of values within an integrated systems approach, of any proposals for development/ infrastructure likely to affect the Lake, environs or tributaries	Encourage investigations into the impacts of any proposed scheme, ensuring a wide range of values are considered	Public reports, progress updates and community informed research projects	Ensure relevant people know about any investigations, and that investigators are made aware of community interests and the desirability of reporting back to the community	Look for opportunities to link stakeholders, tangata whenua and researchers, and to ensure progress updates and research outputs are readily accessible to the community	Press for the establishment of a research facility, research projects and programmes to be focused on matters relevant to 1.2, including compiling a list of topics for potential researchers to investigate that might provide baselines and trends against which new development/infrastruc ture proposals can be assessed; assist with seeking research funding
1.31 Raising awareness of potential changes to climate (including impacts of projects such as CPW)	Raising awareness of climate change impacts	Written resources, web pages, display material, events and meetings	Source relevant information and use it where appropriate		

#### 2. A place of cultural and historical significance that connects us with our past and our future.

Although there are some excellent publications available which detail aspects of cultural and historical significance, these are not always readily available and may not cover all the areas of potential interest. There are many different groups with strong links to the Lake who may not be connected with each other or have an opportunity to hear about others viewpoints and what is significant to them.

There are few visitor facilities or little in the way of interpretative information on sites around the Lake or at key points for public access on main tributaries, so visitors to the area do not always have an awareness or understanding of the significance of the Lake and tributaries across a range of values. Progress has been very slow on visitor facility projects put forward over recent years.

There has been a great deal of research carried out on the Lake and catchment over recent years. This research is not always widely known and understood.

## Working towards the Vision

	Issues/opportunities	Outcomes sought		Possible	Performance	Who	Resources	When
				Actions	Measure(s)			
2.1	Lack of available information	Easily accessible information on the cultural and historical significance	2.11	Develop and update printed resources and web based information on cultural and historical significance to different groups	Printed and web based resources available and up to date	Councils, statutory agencies, iwi, community groups, research organisation s educators	\$\$, expertise,	Some resources available – ongoing work required
			2.12	Develop and update on site interpretative information on cultural and historical significance to different groups	On site interpretative information installed and up to date	Councils, statutory agencies, iwi, community groups, research organisation s	\$\$, expertise,	Within 2 years
			2.13	Provide visitor facilities at key access points to the Lake	Visitor facility established, which features Lake related information	Councils, statutory agencies, iwi, community groups	Land and/or premises made available, \$\$, expertise,	Within 3 - 5 years

## What does this mean for WET?

	Action from WET	Output	EDUCATE	FACILITATE	<i>ACTIVATE</i>
2.11 Develop and update printed resources and web based information on cultural and historical	Review and update resources available, ensure a wide range of interest areas covered	Up to date web site information, new printed resources; information available via range of media (eg	Ensure accurate information made available via websites (eg Papers Past), display material and printed	Bring different groups and experts together to contribute to developing information and resources (eg	Seek funding for specific projects (eg Papers Past, updated Lake Access Brochure, cookbook, developing a Lake App))
significance to different groups		Facebook etc)	resources	Papers Past, cookbook, geological information. school resources)	, -
2.12 Develop and update on site interpretative information on cultural and historical significance to different groups	Work with other organisations on interpretation projects	Active projects working towards on site interpretation and/or signage; new signs/interpretation installed on site	Identify appropriate content for on site information	Work in partnership with other groups to have information and/or signage installed (eg DOC, LRRTT, SDC, F&G, ECan)	Seek provision in annual work programme of statutory agencies for funding of interpretive signage

2.13 Provide visitor facilities at key access points to the Lake	Work with other organisations on visitor facility projects	Facilities which attract visitors to the Lake	Use opportunities provided by visitor facilities eg Lake Research Centre, viewing platforms etc, to have information on Lake values developed and displayed	Work with different groups and experts to contribute to developing new projects	Seek funding for specific projects, eg creation of walkways, viewing facilities, land purchases
2.21 Allowing different groups an opportunity to articulate their views, including bringing to attention of decision makers	Represent views of WET (as articulated in the Vision and Objects); provide a platform for other stakeholders where relevant	Attendance at key meetings/workshops; hosting events, community meetings; submissions on plans, resource consent applications etc	Ensure a wide cross sections of views are represented, offer opportunity to different sectors to share views	Bring different stakeholders together; make submissions where relevant	Organise and host events(eg symposia), meetings etc; provide opportunities for specialist to share knowledge eg seminars, Lake appreciation days

3. A place where environmental, customary, commercial, and recreational values are balanced while respecting the health of the resource.

A number of descriptions of different values exist (e.g., State of the Lake, 2009), however, there is a lack of information about the impacts of different uses on those values and on other user groups. Identifying potential negative impacts and managing users and the interaction between user groups needs more consideration. One key question is around the level of use. If there is increasing awareness of the values and opportunities associated with the Lake, will there be an increase in visitors which may adversely impact on some values such as wildlife?

Many statutory and non-statutory processes are underway which will determine the future of land and water use in the catchment (CWMS, WTW, cogovernance arrangements, irrigation schemes such as CPW, Future for Selwyn). Many of these processes include public meetings, the opportunity to make submissions, hearings and so on, which provide an avenue for people to state their concerns. Not all sectors of the community find it easy to engage with these processes. Where significant development is planned, the economic benefits need to be balanced with environmental, social and cultural concerns and so all sectors of the community need an ability to participate in the process.

## Working towards the Vision

	Issues/opportunities	Outcomes sought		Possible	Performance	Who	Resources	When
				Actions	Measure(s)			
3.1	Lack of information about some values and user groups/levels of use	Ability to plan for minimising conflict	3.11	Gathering data on current and past use, attitudes to the Lake etc which can contribute to decision making Also see Actions 1.21, 1.22, 1.31	Information gathered and made available in a useful format, and regularly updated	Research organisations (LU, UC, Landcare Research etc), councils, statutory agencies, iwi, community groups	\$\$, expertise	Within 2 years
			3.12	Identifying possible points of conflicts, and appropriate levels of use to ensure there is a balance between values  Also see Actions  1.12, 1.31, 2.21,  2.31	Possible points of conflicts identified and measures in place to identify and manage for appropriate levels of use	Research organisations (LU, UC, Landcare Research etc), councils, statutory agencies, iwi, community groups	\$\$, expertise	Within 3 - 5 years

opening regimes and	to the community	updates, newsletters)	of changes eg by using		programmes/apps
monitor and report			newsletter, website,		
impacts of different			display opportunities		
regimes on a wide					
range of values					

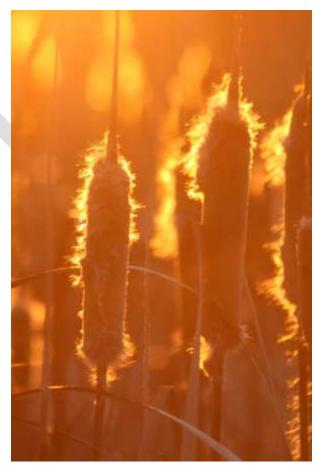

4. A special wide open place for the enjoyment and wonderment of present and future generations; a place of contemplation and tranquillity as well as activity, a place just to be.

Te Waihora/Lake Ellesmere has many unique qualities and, as recognised by the National Water Conservation Order, many outstanding features. Amongst the wider community, particularly on a regional basis, there is a lack of awareness of the Lake and its values. Media reports often focus on negative perceptions of the Lake and environs and disregard the positive attributes. There is some risk that, if the Lake and environs are developed in a way that promotes greater visitor numbers and more participation in recreational activities, it may jeopardise the qualities that many value so highly. However, the area covered by the Lake is large and there is considerable capacity for increasing use of the area for recreational and other activities.

To assist in raising awareness, it is important that the qualities and values that make Te Waihora/Lake Ellesmere a special place are recognised in planning documents, and can be factored into decisions made on the future of the catchment. For example, biodiversity values are well articulated in recent planning documents such as the Zone Implementation Programme, and the Proposed Regional Policy Statement recognises the Lake as having significant landscape value – exceptional for natural science<sup>1</sup> and tangata whenua, and very high for transient<sup>2</sup> and legibility<sup>3</sup> landscape values.

The Lake is also recognised in other databases, e.g., the New Zealand Geopreservation Inventory, which classifies Te Waihora/Lake Ellesmere as B2 – of national importance but vulnerable to significant modifications by human actions.

- 1. Natural Science values the geological, topographical, ecological and dynamic components of the landscape
- 2. Transient values occasional presence of wildlife, or its values at certain times of the day or of the year
- 3. Legibility (expressiveness) values how obviously the landscape demonstrates the formative processes leading to its creation

## Working towards the Vision

	Issues/opportunities	Outcomes sought		Possible Actions	Performance	Who	Resources	When
					Measure(s)			
4.1	Low awareness of the Lake and its potential for recreation (passive and active)	Increased awareness and appreciation of the Lake, and increased recreational opportunities, but with its character being maintained for future generations	4.11	Develop a visitor information centre for the Lake and/or Lake Research Centre See also Actions 2.11, 2.12, 2.13	Visitor facility established, which features Lake related information	Universities , councils, statutory agencies, iwi, community groups, events managers/ sponsors	Land and/or premises made available, \$\$, expertise	Within 3 – 5 years
			4.12	Encourage recreational activities, while ensuring they are managed in a way that maintains the character of the Lake See also action 3.12	Participation in active and passive recreational activities on and around the lake increases from current (2012) levels	Universities , councils, statutory agencies, iwi, community groups, events managers/ sponsors	\$\$, expertise	Underway – increase in activities seen within 3 – 5 years

## Possible Actions – timeframes

1.11	Establish an indicator working party and agree a range of indicators for different values
1.12	Raising awareness of impact of land and water use on Lake though education programmes etc
1.13	Implement best management practices in the catchment (through ZIP and regional planning processes)
1.14	Protect existing indigenous riparian biodiversity/restore indigenous biodiversity
1.21	Establishing appropriate systems for collecting and sharing data
1.22	Facilitating collaborative research projects
1.23	Undertake full investigation of impacts, considering a wide range of values within an integrated systems approach, of
	any proposals for development/ infrastructure likely to affect the Lake, environs or tributaries
1.31	Raising awareness of potential changes to climate (including impacts of projects such as CPW)
2.11	Develop and update printed resources and web based information on cultural and historical significance to different
	groups
2.12	Develop and update on site interpretative information on cultural and historical significance to different groups
2.13	Provide visitor facilities at key access points to the lake
2.21	Allowing different groups an opportunity to articulate their views, including bringing to attention of decision makers
3.11	Gathering data on current and past use, attitudes to the Lake etc which can contribute to decision making
	Also see Actions 1.21, 1.22, 1.31
3.12	Identifying possible points of conflicts, and appropriate levels of use to ensure there is a balance between values
	Also see Actions 1.12, 1.31, 2.21
3.21	High quality participatory community consultation when new developments are planned or key decisions made on
	land and water use Also see Actions 2.21
3.31	Undertake research and modelling to improve understanding of the effects of different opening regimes and monitor
	and report impacts of different regimes on a wide range of values
	See also Action 1.11, 1.21
4.11	Develop a visitor information centre for the Lake and/or Lake Research Centre
	See also Actions 2.11, 2.12, 2.13
4.12	Encourage recreational activities, while ensuring they are managed in a way that maintains the character of the lake.
	Also see action 3.12
4.21	Greater public discussion of the special character of the lake and environs. Also see Actions 1.13, 2.11, 2.12, 2.21,
	3.21, 3.31

# 2. A place of cultural and historical significance that connects us with our past and our future

·acar				
POSSBLE ACTIONS TO ACHIEVE OUTCOMES	2.11 Develop and update printed resources and web based information on cultural and historical significance to different groups	2.12 Develop and update on site interpretative information on cultural and historical significance to different groups	2.13 Provide visitor facilities at key access points to the Lake	2.21 Allowing different groups an opportunity to articulate their views, including bringing to attention of decision makers
	1	1	1	1
WHAT CAN WET DO?	Review and update resources available, ensure a wide range of interest areas covered	Work with other organisations on interpretation projects	Work with other organisations on visitor facility projects	Represent views of WET (as articulated in the Vision and Objects) in variety of forums; provide a platform for other stakeholders where relevant
	1		1	1
ACTIVITIES 2012/13	Continue to work on Papers Past, investigate developing new printed and web based resources, investigate cook book/calendar, investigate developing smartphone app, develop, or assist with development of, education resources, eg worksheets for Lincoln High School, Papers Past resource for schools	Contribute to content for interpretation projects and work in partnership with other groups to have information and/or signage installed (eg DOC, LRRTT, SDC, F&G, ECan)	Work with other organisations and individuals to progress Lake Research Centre, investigate walkways, cycle trails, school education facilities etc, consider involvement with Leeston Heritage Park in aspects relevant to the Lake	Participate in community forums eg Limit Setting Focus Group, Lake Opening Protocol Group, actively participate in SAG meetings, investigate hosting field trips and seminars eg eel seminar, Lake Appreciation Day, and ensure a full range of views represented, make submissions where relevant

3. A place where environmental, customary, commercial, and recreational values are balanced while respecting the health of the resource.

3.11 Gathering data on 3.12 Identifying possible points 3.21 High quality participatory 3.31 Undertake research and of conflicts, and appropriate ACHIEVE OUTCOMES current and past use, community consultation when modelling to improve attitudes to the Lake etc levels of use to ensure there is a new developments are planned understanding of the effects of which can contribute to balance between values or key decisions made on land different opening regimes and and water use decision making monitor and report impacts of different regimes on a wide range of values Continue to be actively involved as Facilitate collaborative research Facilitate collaborative research Help to ensure the community is CAN WET DO? projects and collation of data well informed about planning and projects and collation of data a party to the Lake Opening decision making underway Protocol and act as a conduit for information to the community Look for opportunities to link Attend Protocol Group meetings, Look for opportunities to link Website, newsletter, community researchers and projects, keep **ACTIVITIES** researchers and project, use meetings etc used to disseminate use website, newsletter etc to help website updated with new website, newsletter etc to inform information about any consultation inform community about changes research findings, reference about events eg duck shooting underway and to provide to the opening regime recent research in submissions season and promote awareness of information on a range of user rules eg new stock fencing rules groups and their needs

4. A special wide open place for the enjoyment and wonderment of present and future generations; a place of contemplation and tranquillity as well as activity, a place just to be.

POSSBLE ACTIONS TO ACHIEVE OUTCOMES	4.11 Develop a visitor/information centre for the Lake and/or Lake Research Centre	4.12 Encourage recreational activities, while ensuring they are managed in a way that maintains the character of the Lake	4.21 Greater public discussion of the special character of the Lake and environs
	1	1	1
WHAT CAN WET DO?	Support the development of a Lake centre for visitors and/or research	Support recreation initiatives	Offer opportunities for discussion of the special character of the Lake and what it means to people, Investigate organising seminars, debates, art exhibitions, theatre and literary events with a Lake focus
	1	1	1
ACTIVITIES 2012/13	Work with other organisations and individuals to progress Lake Research Centre, investigate walkways, cycle trails, school education facilities etc,	Compile a contact list for local user groups, assist/support initiatives eg LU student events	Include features on what the Lake means for different groups in newsletters, on website etc, investigate possibilities for featuring Te Waihora/Lake Ellesmere in the design of the Rolleston Aquatic Centre, look for partners for artistic or literary events
